

Mastercam Security Advisory for Log4J Vulnerability

Problem

CNC Software, LLC has been made aware of the Log4J (JAVA) vulnerability ([CVE-2021-44228](https://nvd.nist.gov/vuln/detail/CVE-2021-44228)) discovered on the 10th of December and have been investigating this vulnerability across our Mastercam family of products and our environment. At this time, we have not identified any issues with the Mastercam family of products. Out of an abundance of caution, we've temporarily disabled software updates while we investigate all avenues. Full details on this Java vulnerability can be found in the public advisory (<https://nvd.nist.gov/vuln/detail/CVE-2021-44228>).

We will continue our investigation into this vulnerability and will provide updates as necessary.
